

NAME	DESCRIPTION	STEPS	ACTUAL RESULT	EXPECTED RESULT	Comment
Terms and Condition link and Privacy links are swapped	Once you open the link for Terms and conditions you are redirected to Privacy page and vice versa once you open Privacy page you are redirected to Terms and Conditions page	<ul style="list-style-type: none"> - Navigate to the Factorial HomePage - Click on the Terms and Conditions link and observe the text "This is the privacy document. We are not yet ready with it. Stay tuned!" - Click on the Privacy link and observe the text "This is the terms and conditions document. We are not yet ready with it. Stay tuned!" 	Opening Privacy link leads you to Terms and Condition and opening Terms and Condition leads you to Privacy	Privacy link should lead the user to Privacy page and Terms and Condition should lead the user Terms and Condition Page	I usually like to attach as much information as possible, environment, version, how it's found etc, and add screenshots and videos if possible, if this was done in the
Entering any Negative Number and calculating does not give the user an error message	Entering any Negative number into the input field on the home page and clicking the calculate button the user is left without an error message	<ul style="list-style-type: none"> - Navigate to Factorial HomePage - Input Negative Number in the input field - Click on the Calculate button and observe <p>Bonus steps:</p> <ul style="list-style-type: none"> - Open Developer Console/Network tab before clicking Calculate - Observe that Status Code is 500 INTERNAL SERVER ERROR and response is 500 with message "The server encountered an internal error and was unable to complete your request. Either the server is overloaded or there is an error in the application." 	Entering any Negative number and clicking calculate does not give the user an error message, in Developer tools/network we can see that the status code is 500 with response "the server encountered an internal error and was unable to complete your request. Either the server is overloaded or there is an error in the application"	User should receive an error when he tries to calculate the factorial of a negative number, or be provided with an error message why he is not able to enter negative numbers	
Entering the number 1000 and clicking calculate does not give the user any result	Entering the number 1000 and clicking calculate does not give the user any result	<ul style="list-style-type: none"> - Navigate to Factorial HomePage - Input Number 1000 - Click on Calculate button and observe as no result is shown or error message <p>Bonus steps:</p> <ul style="list-style-type: none"> - Open Developer Console/Network tab before clicking Calculate 	Entering the number 1000 and clicking calculate shows no result or error message to the user	User should receive a message in the result with the text "The factorial of 1000 is: Infinity"
